The LA-200 is a compact 12" two-way line array speaker system designed for use in arrays of up to units.

The constant curvature waveguide mounts two compression drivers on a continuous arc, continues, in effect, all the drivers work together as if they were a single driver on a very long waveguide. Since are three drivers each LA-200, the combined power handling and acoustic output of the system is far greater than a single driver could achieve.

LA-200 uses "amplitude shading" to shape the coverage of the array. Switches on the input plate allow, for example, the upper box in an array to reach a distant balcony while the lower HF section is shaded back to reduce excessive level at the front of the listening area.

One or two LA-200 as may also be used on a tripod or over subwoofers. The integral rigging hardware is used to securely lock the array together while the dual-angle pole socket provides aiming flexibility.

The LA-200 was designed with 18L series compatibility in mind.

LA-200设计巧妙，紧凑的线性阵列音箱系统，体积小、声压大、吊装灵活方便，相同阵列可用于飞吊装或地面堆放。
